

Difference between DevOps and Agile

Agile	DevOps
Emphasize breaking down barriers between developers and management.	DevOps is about software deployment and operation teams.
Addresses gaps between customer requirements and development teams.	Addresses the gap between the development and Operation team
Focuses more on functional and non-functional readiness	It focuses on operational and business readiness.
Agile development pertains mainly to the company's way development is thought out.	DevOps emphasises deploying software in the most reliable and safest ways that aren't always the fastest.
Agile development emphasises training all team members to have varieties of similar and equal skills. So that, when something goes wrong, any team member can get assistance from any member in the absence of the team leader.	DevOps likes to divide and conquer, spreading the skill set between the development and operation teams. It also maintains consistent communication.
